

## Hemocue Learning Center Training

The training is set up in modules. How to's and tips:

- You have to register
  - ® pick public health as type of use/work
  - ® pick Hemocue 201 as the model type being used (unless you have a bigger unit)
- Takes about 17-20 minutes
- Can be paused or sessions repeated
- Must be completed in one setting
- Sometimes the videos appear to be finished but are not even if the time at the top or the bar indicates this, so wait a bit to make sure it has finished the module; it could have something to do with internet speed
- Has a few brief quizzes along the way you must pass
- If requested, it will print a certificate at the end; it may also send it in an e-mail (it did not e-mail when tested); you can click the back arrow on the lower portion of the screen and retry for the certificate
- After opening the training, it advises to check your sound level and then shrinks that screen; the actual training may actually be behind the screen to open the training (that is where it showed up when tested)
- Can be found at <http://www.hemocuelearningcenter.com>
